

# EARLY JUNE PACKING LIST

*If you see this experience at Early June Camp as the first of many years at camp, consider using a trunk for packing. It is essential for the longer sessions. We've mentioned a few resources to purchase one in the document titled "2016-Preparing For Early June Camp".*

## CLOTHES

- \_\_\_\_\_ 1 pillow
- \_\_\_\_\_ 1 pillow case
- \_\_\_\_\_ 2-3 bath towels (*NOT beach towels*)
- \_\_\_\_\_ 2 wash clothes
- \_\_\_\_\_ 1 mesh laundry bag
- \_\_\_\_\_ 2 p.j.'s
- \_\_\_\_\_ 2-3 bathing suits
- \_\_\_\_\_ 2 long pants (at least one sturdy denim)
- \_\_\_\_\_ 5 tee shirts or tank tops
- \_\_\_\_\_ 2 long sleeve shirts or turtlenecks
- \_\_\_\_\_ 1-2 fleeces or sweatshirts
- \_\_\_\_\_ 7 pairs underpants
- \_\_\_\_\_ 4 shorts
- \_\_\_\_\_ 5 pairs of socks (*may want some long socks*)
- \_\_\_\_\_ \*toilet articles (*tooth paste, tooth brush, shampoo, deodorant, liquid bodywash or bar soap w/soapdish*)

## SHOES 1 pair each:

- \_\_\_\_\_ comfortable, everyday shoes (*not flip-flops; but instead Chacos, Crocs, or Tevas or similar style*)
- \_\_\_\_\_ tennis shoes (*2 pairs: 1 for tennis or general use and 1 that can wet or muddy*)
- \_\_\_\_\_ riding/hiking shoes (*tie shoe w/low heel (3/4"), rubber boots or paddock boots*)
- \_\_\_\_\_ flip flops (*for use in shower and around cabin*). Flip flops are **only** suitable for wear around the cabins and main building. Please send sport sandals for general use around camp.

### **A Word To The Wise**

**All of us tend to pack too much. "Less" is easier to keep up with and care for. An "outfit" for every activity is not necessary!**

## ESSENTIAL CAMPING GEAR (for everyone!)

- \_\_\_\_\_ raingear/poncho
- \_\_\_\_\_ sleeping bag (*nylon Shell/polyester filling*)
- \_\_\_\_\_ sleeping pad
- \_\_\_\_\_ cap or hat (*wool or fleece*)
- \_\_\_\_\_ light jacket or windbreaker
- \_\_\_\_\_ \*stuff sack (*large for sleeping bag*)
- \_\_\_\_\_ \*flashlight (*or head light*)
- \_\_\_\_\_ \*2 cheap water bottles
- \_\_\_\_\_ \*bug repellent
- \_\_\_\_\_ \*sun screen
- \_\_\_\_\_ \*bandanas
- \_\_\_\_\_ \*eating utensils(*spoon, bowl, cup*)

**OPTIONAL ITEMS** (*Completely non-essential. These items are simply 'nice to have' according to some of our 'old pro' Main Campers.*)

- \_\_\_\_\_ stuffed animal
- \_\_\_\_\_ washable light blanket or quilt - camp provides sheets and blankets, but many girls like this added touch from home. Please do **not** send sheets.
- \_\_\_\_\_ Crazy Creek Chair (or similar style). Our campers in longer sessions enjoy these, but this is absolutely non-essential for Early June Campers.
- \_\_\_\_\_ disposable camera\*
- \_\_\_\_\_ reading material
- \_\_\_\_\_ extra hair ties\*
- \_\_\_\_\_ extra batteries\* for flashlight
- \_\_\_\_\_ stamps\* and stationary\*

Electronic devices such as MP3 players and iPods are allowed at camp for music only!

**~DEVICES WITH INTERNET CAPABILITY OR CELL SERVICE ARE NOT ALLOWED.~**

*Any device that is internet or cell phone capable will be confiscated and kept in a safe place for the camp session*

*In order to accomodate campers who need a cell phone for their flight to camp, all cell phones are to be turned in at check-in. They will be kept in a safe place until closing day.*

**\* These items may be purchased in the camp store**

# CAMPING OUT

Some summers are dry, some are wet; the weather gods are fickle. The canoeists love the rain (brings the rivers up!); the rock climbers like it dry. When a trip goes out for three or four or five days, they never know what the weather is going to do... and that's part of the fun of it. Adversity is a great teacher, and it can be a wonderful, growing experience to overcome difficulties and accomplish your goals in spite of the weather or other obstacles. It's not a lot of fun, though, if you're not well prepared; it can be miserable, in fact, and even dangerous.

A principal factor affecting the success of a trip taken in adverse conditions is **equipment**. The trick is knowing what to bring, without overloading yourself and spending a fortune. **IF YOUR CHILD WANTS TO DO ANY MORE THAN SIMPLE, OVER-NIGHT CAMPING TRIPS ON OUR OWN PROPERTY, HE SHOULD BE PROPERLY EQUIPPED.** We will not allow a youngster to go on a trip dangerously unprepared. Even overnights can be uncomfortable without good basic equipment.

We are appending the names of several good sources for gear. Two of them, Diamond Brand and Sunrift, are near us, and are worth a stop if you are driving to camp; they can fit the boots, etc.

---

---

## GEAR FOR SAFE SUMMER HIKING

*\*Items with an asterisk may be bought in the camp store.*

*Weather is a very serious thing when you can't get away from it... especially in the mountains. It can be sunny and warm one hour and wet, windy and cold the next, even in mid-summer. That's why hypothermia occurs most often in warm seasons; people forget how changeable mountain weather can be, and go unprepared. It can rain a lot in the mountains, and that usually makes it cold. Unprepared groups can have to be evacuated, even if only one member is affected. Two factors are important: *having good gear*, and *knowing how to use it*. If you'll take care of the first, we'll take care of the second.*

**LAYERING.** The key principle for staying comfortable in the outdoors is to wear several lightweight layers instead of one heavy layer. Get dressed each day starting with what will be comfortable in the hottest part of the day and when you are active. Start with a lightweight synthetic shirt and shorts or pants. Then add a medium weight long sleeved shirt. Add a warm fleece jacket, warm hat, and a rain jacket and you are ready for anything.

**CLOTHING and INSULATION.** When camping, one or two cotton shirts are OK but most of your clothing should be synthetic and quick drying. Nylon, like Under Armour, dries quickly but does not have much insulation value. Capilene or the equivalent is better. Long underwear top and bottoms are great, even in the summer. A mid-weight half zip shirt is also nice. A short sleeve capilene shirt is nice but not absolutely needed. A fleece (not cotton- see sidebar) jacket is a must. We sell them in the camp store for around \$35. A pair of nylon or quick drying, loose fitting pants are very good to have. Quick drying nylon shorts are also great for hiking because they can dry even while they are being worn. A warm hat is good too; more heat is lost from the head than any other part of the body. Camping can be hard on clothes and equipment; don't expect everything to come back from camp like you sent it.

**RAINGEAR.** A lightweight, waterproof **nylon rain jacket** is best (much more durable than plastic). All clothing, especially when

wet, is warmer under a windproof outer layer, and anything waterproof is windproof too. GORTEX (and similar material) is waterproof yet allows ventilation; it is excellent but expensive. It may be worth the cost if you plan to spend a lot of time camping out. Rain pants are not used often, but are great when needed... consider them if you plan a lot of backpacking.

**FOOTWEAR.** The important factors here are overall comfort, protection against bruising the soles of the feet, and protection against twisting and spraining the ankles. Because bruises and sprains are much less frequent than blisters, which can be just as incapacitating, a comfortable pair of good **tennis** or **running shoes** will suffice for most overnights and some three-day trips. **Boots** provide better protection, but are likely to be less comfortable until well broken in. If you do get boots, don't get stiff leather ones; get soft leather, or a combination leather and nylon summer boot, which is more flexible and cooler. (Such a boot at Diamond Brand runs about \$100.) Finally, have some extra **creek shoes** (old tennis or running shoes which you don't mind getting muddy and wet), or sturdy sandals like Tevas you can wear for crossing or swimming in rocky streams; it is hard to carry a pack out of the backcountry with feet cut up by sharp rocks or broken glass.

**Cotton** is a poor insulator when wet, because the fibers become much more compacted than those in wool or artificial fabrics. When wet, it is heavy and dries very slowly. Cotton jeans are especially bad; besides being non-insulative, slow to dry and heavy when wet, the close fit of designer jeans makes them harder to hike in and colder (by restricting blood flow). Artificial fibers like polyester insulate best, dry fastest, are lightest and most durable. Second best is wool; garments of it can often be bought cheaply at Goodwill, Salvation Army, or other thrift stores.

**SOCKS.** Cotton athletic socks are satisfactory for overnight trips, but **combination wool/synthetic hiking socks** are much better for longer trips and/or serious backpacking. These socks provide cushioning and warmth even when wet from rain or perspiration (remember about cotton fibers becoming more compacted when wet). Clean socks for each day are important!

**SLEEPING BAG.** Synthetic is key. Get a mid-cost bag (\$100) with a nylon shell and some form of **polyester filling**. A "mummy" or barrel-shaped bag is lighter, more compact when stuffed, and warmer per pound than a rectangular-shaped one; by clinging closer to the body, it reduces air circulation that causes convective heat loss. A 45 degree temperature rating is quite adequate. A 20 degree bag is warmer but heavier, and not needed. It is important to have a stuff sack for your sleeping bag. We teach campers to put a trash bag inside the stuffsack then stuff the sleeping bag into that for a dry night.

**SLEEPING PAD\***. This is not a luxury item. It is certainly much softer than the ground, but mainly it is an insulator. Even in the summer, the ground absorbs body heat like a sponge. Self inflating pads are great but don't get a heavy one. We sell inexpensive blue foam pads in the camp store.

**SHELTER. Tents** offer great protection from the weather and are a comfortable home away from home. Two-man tents work best for camp as we try to get campers to share tents, thereby reducing weight and campsite size. Kelty makes a great tent for the money. Tents do require all of the various parts be kept track of. Be sure the seams are sealed before camp. **Tarps\*** are simpler and very effective. We sell tarps, rope, and stakes in the camp store. If you think your camper will spend plenty of time in the woods, a tent is a good investment. If he is coming for a very short session or not interested in camping, we can find a partner for him to share a tent with. If he decides to do more he can get a tarp from the store.

**FLASHLIGHT\***. Handy in normal conditions and indispensable in critical ones. Best is a small headlamp that works on AA or AAA size batteries. Small handheld flashlights are good too. Bring spare batteries, and a spare bulb too.

**EATING UTENSILS\***. a.k.a. Cup, Bowl, and Spoon. Even a pancake can be eaten out of a bowl with a spoon. Bring a lightweight, cheap, **plastic cereal sized bowl\***, a **hard plastic cup\*** or **mug**, and a **heavy duty plastic spoon\***. Avoid aluminum, and small, thin plastic cups. An insulated cup is the very best, of course, but is not really necessary in the summer. We have excellent utensils in the camp store.

**WATER BOTTLES\***. We want every camper to have two water bottles. Wide mouth water bottles work best. Aluminum is fine or durable plastic like a Nalgene is good. Camelbacks have their place, but get grungy and are hard to clean.

**PHARMACEUTICALS.** We will carry First Aid kits, but there are a few things you should have of your own. Pain from lips badly chapped by sun and wind is easily prevented by **Chapstick\***. Severe sunburn can be extremely uncomfortable; bring **sunscreen\*** with a high Sun Protection Factor. Waterproof sunscreen, like "Bull Frog", is especially good. Bug bites are itchy and susceptible to infection, so bring **insect repellent\***.

**BACKPACK.** A good backpack should be roomy, sturdy, have a frame either external or internal, and a hip belt. Because good ones are expensive (at least \$90), we do rent them at camp. If you have one that really fits, bring it; otherwise, rent one from camp.

**MISCELLANEOUS. Extra cord\*** (about 3/16") is needed for stringing tarps. **Bandannas\*** are handy. A small pocket knife is a useful tool. See our policy note on knives. Please DO NOT send knives longer than a pocket knife, We do not plan to skin any deer, and big, long knives can be dangerous.

*It's better to put some thought into buying the right gear the first time. Everything except the clothing will last for years of camping.*
